

Annotation Studio Workshop

Program 01/28/2014

- 1:00 **Introductions and brief overview**
Kurt Fendt, Executive Director, MIT HyperStudio
Jim Paradis, Professor, CMS/W
- 1:30 **Demo of Annotation Studio**
Jamie Folsom, HyperStudio Web Developer
- 1:50 **Annotation Studio Hands-on**
- 2:15 **Annotation Studio in the Classroom**
Round table discussion of experiences & use cases
Wyn Kelley, Senior Lecturer, MIT Literature
Suzanne Lane, Director, Writing Across the Curriculum
Jim Paradis, Professor, CMS/W
Kurt Fendt, CMS/W & Foreign Languages & Literatures
- 3:00 **Break – 10 minutes**
- 3:10 **Break Out Sessions**
1. Pedagogical Uses
2. Non-Pedagogical Uses
3. Deployment and Development
- 4:30 **Re-convene and Closing Discussion**

Network Connectivity for MIT Guests

IS&T offers short-term network service to campus guests. Guests are allowed up to fourteen days of network service when they register on the wired MIT network (MITnet). To get their personal machine connected to the MIT network, campus visitors need to have a computer that can connect to either an Ethernet cable or to the wireless network.

Wireless

For wireless connections, visitors need to make sure the wireless card is on and enabled. Select MIT GUEST as the wireless network option. A connection will occur without registration. There is no limit to the number of days a visitor can use the MIT GUEST wireless network.

Wired

For wired connections, plug the Ethernet cable into the computer and to an MITnet network drop. This drop will likely have a green MITnet sticker.

The machine needs to be configured for DHCP (*obtaining an IP address automatically*). Many machines come with their network cards configured for DHCP by default.

Once the equipment is ready to connect, open a web browser and point it to any web page. A page will appear, prompting to select your registration option. After selecting Visitor registration, the returned page will display the MITnet Rules of Use, followed by a screen requesting the visitor's contact information, number of days of connectivity, and the event for which they are on campus.

Visitors can register between one and five (consecutive) days at a time, up to fourteen days per year. The network connection takes about ten minutes to activate, and remains active for the number of days selected.
